

Herbicide Resistance!!

As you are harvesting you may notice paddocks with high numbers of Ryegrass you will no doubt go through the thought process of why there is so much Ryegrass? **What could you have done differently to prevent it? and why the implemented control measures didn't work so well?** The reasons for Ryegrass problems are numerous, including:

- ♣ High Ryegrass seed bank numbers.
- ♣ Water logged soil
- ♣ Heavy stubble residue preventing herbicide incorporation
- ♣ Rainfall not activating herbicides on non wetting sands
- ♣ Herbicides leaching with heavy rainfall
- ♣ Poor control measures
- ♣ Late germinating Ryegrass
- ♣ **Herbicide Resistance**

Now is the ideal time to have seed collected for resistance testing. It's a small investment to make to know which herbicides are still effective and the ones that are not. Testing takes away the guess work and prevents you from continuing to use herbicides that may have a strong level of resistance. **There is increasing resistance to commonly used herbicides** that have previously been working well for us such as Trifluralin and Clethodim (Select). Alarmingly there are also more tests showing increasing resistance to Glyphosate. Contact your agronomist today to discuss if this test can benefit you.

If you would like to receive your Landmark Rewards goodies before Christmas, please have your claim forms in before 5pm on the 11th of November.

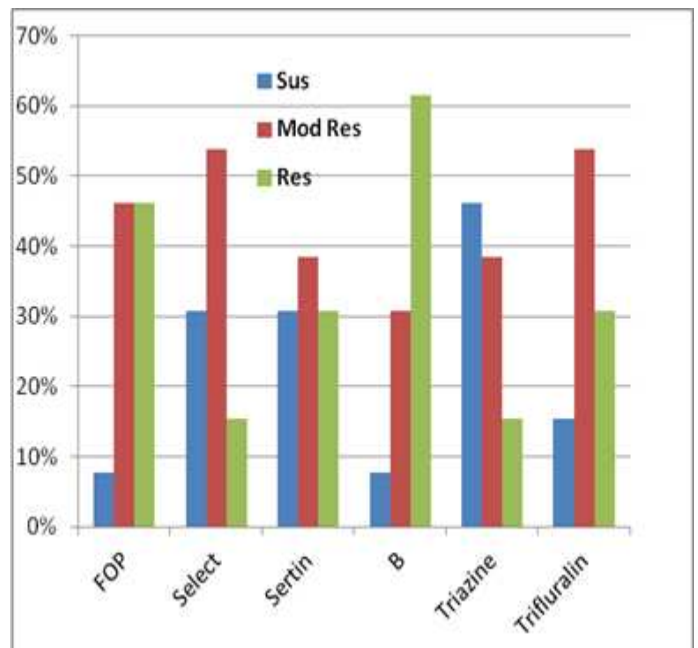

Remember it's the last one ever so make sure you use up all your points, as they will not carry over beyond March next year!!!!

www.landmark.com.au/landmark-rewards

Remember to check with Nufarm Top Croppers to check you still have an active account. You must be registered by the end of November 2011.

Percentage (%) population resistant from 13 samples

Dicko and Vaughan are in the USA to check out some options on new machinery. Watch this space for an update on their findings next month!!!!

Coming Soon...

APACHE SELF PROPELLED SPRAYERS

3 MODELS AVAILABLE

750, 1000, AND 1200 Gallon tank sizes

Up to 56 kph road speed and 215 hp Cummins engine

Mechanical 2WD with power shift transmission

Up to 36m boom width

Fixed or adjustable axle width

Choice of controllers and guidance options available.

For more information call Vaughan or Dicko in December

Dicko 0427 641 435 or Vaughan 0427 873 075

New Stock machines

- Hardi Commander 8500ltr with 38mtr Terra force boom with auto height
- Hardi Commander 6500ltr with 36mtr force
- Hardi commander v 5000ltr with 30mtr eagle

Second hand

- Hardi Explorer 3418 \$15,000+gst
- Hardi Navigator 5024 \$42,000+gst

New GPS auto steer in stock

Attention Trimble EZ Guide 500/750 owners.

Looking for a RTK solution? We can help you out with our CORS Network.

You'll need our CORS Receiver \$2400*, 500 hour license \$385, SIM Card \$10 per month, and Trimble RTK Unlock Code \$908. (Approximate total cost of \$3703)

****Will need SMS phone service for this system to work****

New Alpha Evo!!

Call Dicko today to discuss this exciting new SP!

Phone Dicko 0427 641 435 or Vaughan 0427 873 075 for more information.
